

Autophagy in Health and Disease

**Autophagy Workshop 2022-
LS² Autophagy Section**
Friday, September 16, 2022
Lausanne

Posters

1

Leytens, Alexandre

University of Fribourg

A targeted proteomics assay to monitor autophagy

2

Luciani, Alessandro

University of Zurich

Lysosomal cystine mobilization through cystinosin tailors mTORC1 signaling to guide cell fate decisions in the kidney

3

Brunner, Melanie

University of Fribourg

Phosphoproteomic characterization of GSK-3 targets in autophagy

4

Bill, Anna

University of Bern

The oncogenic DMTF1 β splice variant promotes early autophagy-dependent cancer cell motility

5

Depierre, Pauline

University of Lausanne

Autosis-mediated neuronal death: what are the molecular mechanisms?

6

Descloux, Céline

University of Lausanne

CHARACTERIZATION OF CELL DEATH AFTER PERIVENTRICULAR HEMORRHAGIC INFARCTION IN PREMATURE HUMAN NEONATES, AN ONGOING STUDY

7

Ginet, Vanessa

University Hospital Lausanne

Autophagy-mediated neuronal apoptosis: a key role played by autophagosomal membranes?

8

Chalatsi, Theodora

University of Lausanne

The roles of autophagy in PV expressing neurons

9

Mandhair, Harpreet

University of Bern

ULK1 inhibition preferentially targets Germinal Centre B-cell – Diffuse Large B-cell Lymphoma subtype by attenuating autophagy, C-MYC and inflammation

10

Daskalaki, Akrivi Dimitra

University of Lausanne

Unravelling the role of the core autophagy protein ATG101 in the brain

11

Kallergi, Emmanouela

University of Lausanne

Profiling of purified autophagic vesicle content and degradome in the maturing and aging brain

12

Tuomaala, Joel

University of Bern

Preferential ribophagy at an organismal scale: balancing starvation survival and recovery dynamics

13

Restivo, Leonardo

University of Lausanne

The Neuro-Behavioral Analysis Unit at the Department of Fundamental Neurosciences (FBM, UNIL)

14

Peker, Nesibe

Koc University

Autophagy, mitophagy and ubiquitin proteasome system proteins form a protein complex that regulates autophagic clearance of mitochondria

15

Schmidt, Katarina

University of Zurich

NDP52 restricts KSHV entry through recruitment of selective autophagy to virus-containing endosomes

16

Bindschedler, Annina

University of Bern

Non-canonical LC3 lipidation at the parasitophorous vacuole membrane of *Plasmodium berghei* liver stage parasites promotes parasite survival

17

Mélanie, Reinero

University Hospital Lausanne

Impairment of autophagy in hypoxic pulmonary hypertension associated with right ventricle failure.

18

Milano, Giuseppina

University Hospital Lausanne

TBD

19

Babic, Riccardo

University of Freiburg

Molecular regulation of the formation of the phagophore assembly site in mammals

20

Roduit, Raphael

Jules-Gonin Ophthalmic Hospital

Hypoglycemia induces autophagy in the mouse retina

21

Elsaesser, Jana

University of Freiburg

Dissecting molecular mechanisms in selective autophagy using a synthetic in vivo approach

22

Barz, Saskia

Albert-Ludwigs-Universität Freiburg

Conserved YKT6 regulation of autophagosomal compartment fusion is driven by Atg1/ULK1 phosphorylation in yeast and mammals

23

Chavez, Myra

University of Bern

Zebrafish model to study autophagy and lysosomal processing in cardiovascular development
