LS² Collaboration Booster

30 October 2024, University of Bern, Hauptgebäude H4

LS² Collaboration Booster is a first-of-its-kind event in Switzerland!

Come join us and witness how 100 participants merge into teams to win the Best Collaboration Project title!

Why are we doing this:

Various post-event feedback surveys conducted by LS² showed that our event participants highly valued the given networking opportunities. However, unstructured networking often does not bring measurable results. Therefore, we would like to offer the scientists from academia and industry the ecosystem needed to create new collaboration projects.

How are we doing this?

A one-day event will offer “speed dating” opportunities to participants from various life sciences fields and will enable them to form teams while brainstorming on creative collaboration projects. The designated jury will consult and challenge the formed teams. At the end of the day, the winning project will be determined.

Why join this event as a sponsor:

Collaboration projects help maximize the resources and excel in research ideas. If you believe that both, the academic and industry teams can benefit from the new collaboration projects, join this pioneering event, which could possibly result in an event series.

Help us make this event possible!
