A branched view of academic career paths

The trajectory toward a tenured academic position is often depicted as a thorny, linear path that can be conquered by following a specific “winner’s recipe”. We will discuss the likelihood of obtaining tenure and challenge commonly portrayed notions about the so-called academic career path. The aim is to equip early-career researchers with a realistic understanding of their possible futures and to support established researchers in better guiding their junior colleagues.

The Career I Didn't Plan: Pivots, Pandemics, and Pathoplexus

Emma Hodcroft didn't plan to become a pandemic scientist, a science communicator, or the co-founder of a viral genome database - and yet, here we are. Join her for an honest look at the detours, risks, and unexpected opportunities that continue to shape a career in science.
